

We're Here To Help You Grow

✓ Boost Efficiency

Running a business is hard enough without disconnected systems slowing you down. By bringing inventory, production, operations, payments, and reporting into one place, you reduce manual work, prevent costly errors, and gain real-time visibility.

✓ Tailored Support

We take time to understand how you grow, ship, and sell, then shape workflows around how you actually operate. And when you need help, our dedicated team is right there with you, offering guidance you can trust when it matters most.

✓ Industry-Driven Innovation

Sed ultricies nulla posuere pretium efficitur. Cras laoreet neque non erat pellentesque, non laoreet purus consectetur. Donec et turpis eu enim semper ornare.

“We spent more time **listening** than **selling**. The result is an product shaped by **growers, a proven workflows, & real operational needs.**”

Best in class ERP platform Built For Growers

From seed to sale, SBI Software brings every part of your operation together—inventory, production, online orders, and more. A powerful ERP platform built specifically for growers. Simplify your workflow, reduce waste, and sell faster with software designed to help you grow.

Software that **respects experience**

About Us

For over 25 years, we've partnered with growers to help them reach their fullest potential. We understand the complexity of the plant and growing industry, which is why we continuously improve our platform to make daily operations more efficient, profitable, and easier to manage.

SBI Software is a leader in all-in-one grower management software built for greenhouses and nurseries. From production planning to cash collection—and every step in between—our platform supports your entire business with clarity and control. More than software, we're a trusted partner, combining industry expertise with innovation to help growers scale confidently and grow smarter.

Our Mission

Our mission is to deliver the best-in-class ERP platform built exclusively for the plant and growing industry. We combine deep industry expertise with leading-edge software to simplify operations, strengthen human connections, and help growers scale with confidence. By partnering closely with the industry, we lead through innovation—empowering businesses to grow smarter, operate stronger, and build lasting success.

Explore over 45+ tools for you

Growing & Inventory

When inventory slips, profits vanish. SBI Software was built to give growers total control through powerful office and **mobile** tools that keep operations lean, accurate, and sales channel worldwide.

Production Planning

Precision matters. Plan production to the day plants are ready to ship—reducing delays, waste, and missed opportunities. Let the system handle the complexity so you can focus on growing with confidence.

Analytics & Reporting

High-powered analytics and reporting turn raw data into clear insights that drive smarter decisions and stronger margins across planning, production, inventory, sales, forecasting, and long-term growth.

Order Proc. & Shipping

From creation to delivery and everything in between (allocation, POS, replenishment, EDI, picking and racking, detailed load and route planning, and much more) all fully connected in one system built to scale with your operation.

How to Get Started

Book a Demo

We'll show you how the platform works and — more importantly — how it fits your world. No scripts, no pressure, just a real conversation about your business.

Personalized Setup

Every operation is different, and yours deserves more than a cookie-cutter solution. We'll configure everything around the way your team actually works.

Go Live

This is the exciting part. Your team gets real training from real people, so when launch day comes, everyone feels ready — not rushed.

Ongoing Support

As your business grows and changes, we're right here — answering questions, solving problems, and helping you get the most out of every tool.
